2024/10/11
Due to the unstable supply of Sunon brand 5015 and 4010 fans, we will switch to SIBOOR's own brand products, which use environmentally friendly flame-retardant materials, imported bearings, and multi-component motherboards.

2024/6/28

- The Nema 17 motor in the Siboor Voron 2.4 AUG Kit has been switched to SIBOOR-42STH48-2504 Class H (185℃) for a higher temperature rating, and it is equipped with a compatible motor extension cable.
- Removed 24WG silicone cable 0.2 square (red 25M).
